- Technologies used: Spring Boot MVC, Bootstrap, Core Java, JSP.

EXPERIENCE

Junior Software Developer Intern

feb2023 – jul2023

- Converted Figma designs into responsive and interactive front-end web pages using HTML, CSS, Bootstrap, JavaScript, and jQuery.
- Ensured cross-browser compatibility and optimized web pages for performance and user experience.
- Developed and implemented business logic using **.NET Core MVC** to align with business requirements.
- Designed and maintained server-side components, ensuring seamless integration with the front-end.
- Conducted thorough testing to identify and fix bugs, ensuring high-quality deliverables.
- Managed code versions using **Git and GitHub**, including committing changes, reverting code, and collaborating with team members.

ACHIEVEMENTS

- **Won Third Prize** in an inter-college web development competition organized by **Universal College**, showcasing technical expertise and creativity.
- **Hosted multiple IT events** at various colleges while representing my college, demonstrating leadership and organizational skills.
- **Secured First Prize twice** in treasure hunt events at **SNDT College** and **Guru Nanak College**, highlighting problem-solving and teamwork abilities.
